How to Improve HEDIS® Scores

- Use the California State Immunization Registry (CAIR) to register immunizations: <https://cair.cdph.ca.gov>.
- Review a child's immunization record before every visit and administer needed vaccines.
- Recommend immunizations to parents. Parents are more likely to agree with vaccinations when supported by the provider. Address common misconceptions about vaccinations.
- Have a system for patient reminders. The lowest vaccination rates are seen for rotavirus and influenza. Ensure that the rotavirus vaccination series is completed by 6 months. If children 6 months to 23 months have never received the influenza vaccine, they should receive 2 doses at least four (4) weeks apart.
- Some vaccines may have been given before the patients were Blue Shield Promise members. Transcribe these vaccinations into CAIR even if your office did not provide the vaccine.
- Request a focused list of members who need to complete the childhood immunizations series from your Blue Shield Promise Quality Program Manager.
